	NEGOTIATED TIER-3 PACKAGE PRICE (Tier 2 + screen)		₹ _____

C · Package combinations, duplicate removal & final price

Where a tier stacks two packages, the overlapping tests are paid for twice. Strip the duplicates and price the combination as one panel.

Tier 1 — single package, no overlap

Build	Duplicates to remove	Final
Total Health Platinum (2,999) + 4 add-ons (insulin, free T3/T4, hs-CRP, homocysteine)	None — single package	₹ _____ ref 7,279

Tier 2 — Women under 45 (FM Base + PCOD combined)

PCOD Advanced repeats tests the FM Base already has. Combine the two, remove the repeats, keep only PCOD's unique hormones.

Step	Detail	₹
FM Base	full FM base panel (23 tests)	12,500
+ PCOD Advanced	list price	6,999
– Remove duplicates	CBC · Thyroid (TSH/T3/T4) · Fasting Insulin · CRP · Blood Sugar + HbA1c — all already in FM Base (≈ ₹3,440 of repeated tests)	–3,440
= PCOD's unique value	FSH, LH, AMH, Prolactin, Total + Free Testosterone, DHEA-S	~3,560
Combined base + hormones	FM Base + PCOD (deduped)	~16,060
+ Add-ons not in either	Estradiol (850), Progesterone (850), SHBG (2,800), 17-OHP (1,800), Lp(a) (1,300), AM Cortisol (850)	8,450
	NEGOTIATED TIER-2 (Women <45) PACKAGE PRICE	₹ _____

Tier 2 — Women 40+ and Men (FM Base only, no second package)

Client	FM Base + à-la-carte hormones + Lp(a) + AM Cortisol	Ref ₹
Women 40+	FM Base 12,500 + FSH, LH, E2, Progesterone, DHEA-S, Total Testosterone, SHBG, Lp(a), AM Cortisol	₹ _____ ref ~22,800
Men	FM Base 12,500 + Total + Free Testosterone, SHBG, DHEA-S, E2, Prolactin, LH, FSH, Lp(a), AM Cortisol	₹ _____ ref ~24,850

No package overlap here — single base + individual hormones. Hormone rates are the negotiation lever (~2× market as quoted).

Tier 3 — Tier 2 + screens (individual add-ons)

Screens are added individually — do NOT buy Ultra/Senior just for the cancer markers, as those packages re-duplicate the whole organ base. Add-ons are cheaper.

Build	Final
Tier 2 (above) + RBC Folate, RBC Magnesium, Zinc, PM Cortisol, ANA, Anti-CCP, tTG-IgA + cancer screen (Women: CA-125 + CA 15.3 / Men: PSA total + free)	₹ _____

D · Acumen's package discount vs catalogue (the benchmark)

Catalogue value = sum of each package's tests at Acumen's own DOS list price. A few grouped panels (CBC, LFT, KFT, lipid, thyroid, iron, urine) priced at their bundle rate; testosterone/DHEA-S at quoted rate. Discounts are approximate but directionally clear.

Package	Catalogue ₹	Package ₹	Discount
Elite Gold Wellness	5,330	1,699	68%
Total Health Platinum	9,210	2,999	67%
Diabetes Advanced	11,080	4,499	59%
Ultra Women's	12,140	4,999	59%
Ultra Men's	11,590	4,999	57%
Senior Citizen	16,580	7,499	55%
PCOD Advanced	12,440	6,999	44%
Average package discount			~58%
Custom FM Base (his quote)	18,400	12,500	only 32%

The FM Base is 26 points below his average package discount. At his own standard ~58%, the catalogue value of ₹18,400 should price at ~₹7,700, not ₹12,500. PCOD (44%) is his thinnest discount — hormones hold his margin; the routine bundles (67–68%) are deepest — which is why Tier 1 builds on Platinum.

E · What we're asking Acumen for

- Package price per tier** — fill the blanks in Section C.
- Bring the FM Base discount in line with your retail packages.** Your packages average ~58% off catalogue (Platinum/Elite Gold 67–68%); the FM Base quote is only 32% off. As a recurring B2B partner, match at least your standard package discount — at 58% this base is ~₹7,700.
- Combine FM Base + PCOD as one panel for women <45** and strip the duplicated tests (CBC, thyroid, insulin, CRP, blood sugar) — price it as a single combined panel, not the sum of two.
- Tier 1 to build on Total Health Platinum (₹2,999)**, not the ₹12,500 base — confirm the 4 add-ons (insulin, free T3/T4, hs-CRP, homocysteine) at a fair bundled rate.
- Hormone add-ons to market rate** — current quotes run ~2× (AMH ₹2,350 vs market ₹910, prolactin ₹700 vs ₹350, etc.). This is the main lever on Tiers 2 & 3.
- Rev-share on add-ons**, not just the base — confirm 25% applies across the board.
- Add RBC Folate + RBC Magnesium** into scope (currently excluded from the base) — needed for the FM panel.
- Home sample collection + digital reports** included.
